

Introducing Bumble & Buzz Math

At all Birch Tree Academy Schools

Introducing A New Math Program

We are excited to introduce Bumble Math for our Toddler Program and Buzz Math for our Preschool Program. Both play-based curriculums are designed to inspire curiosity, confidence, and joyful engagement while building a strong foundation in early mathematics.

Building Skills Through Play

Bumble and Buzz Math turns everyday play into meaningful learning experiences. Through engaging, age appropriate activities, children build confidence and foundational skills in:

- Numbers and counting
- Sorting and matching
- Shapes and patterns

- Spatial thinking
- Early number operations
- Measurement

Meaningful Math Every Day

Each week features a focus activity that educators build upon with new challenges and opportunities for exploration. Everyday experiences become meaningful opportunities for mathematical learning. Children build skills naturally through play, routines, and exploration.
